

Announcements

Voting is complete for the first round of the BMB department design contest. Thanks so much to each of the entries. They all were really amazing. It was incredible to see the time and effort they put into their work. The winner of this round was Kayla Johnson. Kayla is a graduate student in Arjun Krishnan's lab. Congratulations Kayla!

Applications are now being accepted for the next round of TEAM-UP Postdoctoral Fellowships. These awards are for postdoctoral associates to conduct research under the mentorship of a team of two or more BMB faculty, with the objective to generate preliminary results in an area of research relevant to BMB that is currently under-funded. Complementary expertise of the mentors that will afford synergistic gains in terms of postdoctoral training is essential. More information can be found [here](#).

Benefit-eligible staff and faculty can access FREE online resources through [elevateU](#). There are programs that cover leadership, IT & desktop, business, finance, human resources, change management, project management, interpersonal skills and so much more.

Resources are available in a variety of formats including videos and interactive courses and books. Utilize the resources as reference tools to help answer your day-to-day job questions or as part of your ongoing personal and professional development. Many of the courses are even approved for Continuing Education credits!

Please join me in congratulating Christoph Benning and Gregg Howe for being recognized in the 2020 Highly Cited Researchers List compiled by Clarivate Analytics. Each year, the Web of Science Group identifies the world's most influential researchers. The list includes those who have been most cited by peers over the past decade. This year 9 faculty from MSU were recognized. Read more [here](#).
