

Tenure-Track Biology Positions at Ball State University

The Department of Biology at Ball State University is inviting applications for two tenure-track faculty positions in (1) Cell/Molecular Biology and (2) Genetics. The successful candidates will (1) teach courses at both graduate and undergraduate levels and maintain a research program that involves undergraduate and master's students and complements existing department research programs.

I have been at Ball State since Fall 2012. From a personal perspective, the department and university have been extremely supportive of my research and teaching agendas throughout my time here. I have highly motivated students working in my lab and very friendly and supportive colleagues with active research programs. Since I've arrived at Ball State, nearly all new tenure-track hires have been successful in obtaining substantial grant support from NIH, NSF, or a private foundation. It is a fun and exciting time to be at Ball State!

I would be happy to answer any questions that you or any potentially interested individuals might have. Applications will be accepted through January 7, 2019.
