Instructions for making glass knives (TEM)

Last modified Apr 16 2009

1. Take off the hood of the glass knife machine. Take out a long piece of (glass-knife) glass and rinse with Windex and water. Wipe with kimwipe
2. Turn knob A to position 1. Cut the glass into 2 equal pieces. Cut each piece into 2 equal and smaller pieces. Repeat one more time.
3. Turn knob A to position 2. Cut the square glass into two triangular pieces. Check knife edge under dissecting microscope.
Glue the boat onto each glass knife and check the knife edge again.
