

Course syllabus and information

Course information

Biochemistry and Molecular Biology 462 (BMB462) - Advanced Biochemistry II

11:30 am – 12:20 pm; MWF

101 Biochemistry

Fall semester 2017

Contact Information

Instructor Information	Lectures	Office and Office Hours
Dr. Kevin Haudek Course coordinator Phone: 353-4377 haudekke@msu.edu (must include BMB462 in subject line)	1-23	219 Biochemistry Bldg. Mondays 2-3 p.m. Tuesdays 10-11 a.m. or by email appointment
Dr. Monique Floer floer@msu.edu (must include BMB462 in subject line)	24-39	410 Biochemistry Bldg. Mondays and Wednesdays 4-5 p.m.
Sandy Olenic	Teaching Assistant	Reviews: 101 Biochemistry Tuesdays and Thursdays 5-6 p.m.

Course Materials

Required

- Nelson, D.L. and Cox, M.M. Lehninger Principles of Biochemistry, 7th ed. (2017). W.H. Freeman, New York. 1172 pages.
- Access to Sapling Learning (www.saplinglearning.com); an online homework system integrated with an electronic version of the textbook.

Using the older version of the textbook is an option, but if you elect to do so, you are responsible to match the required reading pages/sections appropriately. Alternatively, you may elect to purchase an electronic version of the textbook directly from the publisher.

- i>clicker remote

Optional

The study guide associated with this textbook (*The Absolute, Ultimate Guide to Lehninger Principles of Biochemistry: Study Guide and Solutions Manual* by Marcy Osgood and Karen Ocorr) is an optional resource for this course, but many students have found it helpful in the past.

Course Objectives

BMB 462 is the second semester of the undergraduate series, BMB 461-462, which provides students with an introduction to biochemistry at the advanced undergraduate level. It is designed primarily for students majoring in Biochemistry or closely related fields. BMB 462 is a three credit course that continues the study of metabolism begun in BMB 461 and then examines the transmission and expression of the genetic material in bacterial and eukaryotic cells. At the conclusion of this course, successful students will be able to:

- Explain the roles of common membrane components and predict how the membrane will change based on changes in these components.
- Explain how signals are transduced in cells, categorize specific parts of signal transduction cascades based on general signal transduction principles, and predict how changes in a signaling system will alter the signaling process.
- Discuss the processes used to metabolize lipids, amino acids, and nucleotides, explain the function of individual reactions in these processes, and connect these processes with central metabolic pathways.
- Explain the mechanisms used to regulate cellular metabolism and predict how changes in these regulatory mechanisms will impact cellular metabolism.
- Explain the roles of nucleotides and nucleic acids in cells based on the structures of these molecules and predict how changes in these structure alter their functions.
- Explain how biomolecules store and transfer information and how this information is recognized and used by cells.
- Diagram the processes used to synthesize, repair, and recombine DNA and compare the structure and function of key proteins involved in these processes.
- Diagram the processes used to create various cellular RNAs and compare the structure and function of key proteins involved in these processes with proteins used to synthesize, repair, and recombine DNA.
- Diagram the processes needed to synthesize and target proteins and discuss the structure and function of key molecular machines involved in these processes.
- Explain how gene expression is regulated using classic examples of gene regulation as models, categorize specific examples of regulation by general regulatory mechanism, and predict how changes in a regulatory system will alter gene expression.
- Design a basic DNA cloning experiment incorporating the general processes used in cloning DNA.

Assessments

Your grade in BMB 462 will be determined by your performance on the following assessments and weighted by the percentage indicated:

Assessment	Weight	Date or information
Exam I	20%	Sept. 25
Exam II	24%	Oct. 20
Exam III	20%	Nov. 13
Final exam (Exam IV)	24%	Dec. 13 per University Final Exam schedule. You will have 60 minutes to complete the exam.
In class clickers	4%	Used during every lecture; each day weighted equally. Drop lowest 5 scores at end of semester
Online homework	8%	Weekly assignments; drop lowest 2 scores at end of semester

Additional information about each of these assessments is given below. A total of 0.5% bonus can be earned for completion of optional online quiz and course survey at the end of the course. The purpose of the extra credit is to give you the opportunity to ensure that if you are within 0.5% of a cutoff for a particular grade for the course that you will earn the higher grade. Please check D2L during the last week of class for this optional assessment. No other bonus opportunity or extra credit is offered in this course.

Exams

Exams will contain a mixture of multiple choice, true/false, calculation and free response questions at the instructor's discretion. Each exam contributes to your final course score based on the percentage of indicated above. Exam answer sheets will be provided for all students. Midterm exams will be held in the same room and class time as lectures. Check the university's final exam schedule for details on the final exam location, day and time.

To ensure fairness, we have developed a set of rules. You will enter the room through the specified door(s) and will be assigned to a seat by the instructor or test proctor. Once you are in the room, refrain from talking to your classmates. You must not open the exam until instructed to do so. You will get warnings approximately 15 min and 5 min prior to the end of the exam. Filling in any part of the exam after time has been called is considered cheating and will be dealt with accordingly! When finished, you should put all portions of the exam into the appropriate boxes at the front of the room. You should not talk until you have left the room and/or all of the exams are collected. A copy of the exam with key will be posted when grades are available. Deadlines for reviewing your exam for errors will be given after each exam.

Calculators without Wi-Fi capabilities *may be allowed* on exams. Policies for each exam will be clarified by the instructor in the lecture(s) immediately before the exam and/or via email. Calculators with Wi-Fi capabilities, cellphones, and other Wi-Fi devices *will not be allowed* during any exam.

In class clickers

This course will use i-clickers during lecture both to assess your knowledge of some basic course content and to facilitate active learning. Clickers may be registered through D2L; instructions are posted there. If you do not register your clicker before the first midterm exam, you will not receive credit for previous clicker questions. *There are no make ups for points associated with clickers, for any reason.*

During a typical lecture you will have one or more opportunities to answer questions using the clicker. You will receive 9/10th of a point for sending in any answer and an additional 1/10th of a point for sending in the correct answer. Some questions are designed to generate discussion and may not have a single correct answer. In this case, you will receive one point for any answer. At the end of the semester your lowest five days will be dropped from your grade. Because of this, you can miss class occasionally for emergencies, religious days, or other commitments without seriously impacting your clicker scores.

Clicker points for the entire semester are worth 4% of your final grade. It is your responsibility to understand the feedback lights on your clicker and verify that your answers are received. It is also your responsibility to check your clicker grade in D2L on a regular basis to verify that your points are being recorded correctly. It is your responsibility to bring your clicker to class each day and if you forget to bring your clicker or miss class for any reason, you will receive no points for that day. You must attend class and use your clicker to receive points: having a friend bring your clicker is a breach of academic integrity and will be treated as such. If you need to replace or re-register your clicker or there are problems with your clicker grade in D2L, please notify the TA immediately.

Online homework

Homework for BMB 462 is delivered through SaplingLearning (www.saplinglearning.com). Information about how to register for this site and find the correct course will be delivered during the first week of class. Make sure to follow registration instructions closely. These homework assignments covers some of the key concepts you need to know but are not designed to be exhaustive.

The homework problems over the course of the entire semester are worth a total of 8% of your final grade. There will be a homework assignment due each week. Most of the time, the due date will be on Sunday night with the exception of exam weeks, when the due date will be adjusted. It is your responsibility to check SaplingLearning regularly to find when each assignment is due. At the end of the semester, your lowest two homework scores will be dropped. Your average percentage correct on each of the remaining assignments unit will be used to determine what percentage you earn for your overall homework grade. Because we are dropping some of your homework scores, there will be no deadline extensions or make-up points offered for any reason. This includes, but is not limited to, illness, technical/computer issues, vacations, etc.

You are encouraged to work together on homework problems and help each other learn how to solve these problems but you must log on and solve your own homework problems to receive credit. Posting or sharing of homework answers, at any website, is not allowed, is a breach of academic integrity, and will be treated as such.

There may also be optional homework assignments that will neither be collected nor graded, but completing them will help you prepare for the exams. There are also questions in the textbook at the end of each chapter, and you should incorporate these questions into your studies. The answers to these questions are provided in the back of the book. Working in groups on all of the optional problem sets is encouraged as a highly valuable study strategy.

Make-up Policy

There will be no makeup or adjustments to clicker scores or online homework for days you miss class or deadlines, except in the case of an unexpected, severe and extended illness. Each of these assignments (e.g. clickers & homework) has a few low scores dropped at the end of the semester to address occasional student absences (for any reason). Students do not need to provide documentation in

order to receive these dropped scores. In the case of an extended (>7 day) illness, students must notify the instructor before or during the absence and must be able to supply relevant documentation as requested by the instructor. When these extended absences have been verified, instructors will suggest possible accommodations for these cases.

With the exception of extended technical problems originating in SaplingLearning system, there are no extensions on homework deadlines.

Exam absence

Scheduled exam dates are provided in the course schedule. If you will miss an exam due to travel to/from an academicly or professionally related event, an MSU sponsored event or religious observance which can be anticipated in advance you must contact your instructor more than one week prior to the exam to determine if you are eligible for alternate exam arrangements.

If you unexpectedly miss an exam due to extenuating and unforeseen circumstances, such as significant illness or death of a loved one, you must contact your instructor within 24 hours of the missed exam.

In order to be considered for make up exam arrangements it is your responsibility to provide adequate documentation as requested by the instructor. You may or may not be eligible for a make up exam based solely on the discretion of the instructor(s). If the instructor determines that you are not eligible for alternate exam arrangements and you do not/did not take the exam, you will earn a 0 on the exam.

For grief absences students must notify the Associate Dean or designee of their college of the need for a grief absence and must provide appropriate verification. The associate dean or designee will work with the student to determine the length of the absence and will notify faculty of the absence period. The policy on grief absence is described here: <https://reg.msu.edu/ROInfo/Notices/GriefAbsence.aspx>.

Make-up exams are administered at the instructor's convenience, typically within 48 hours of the original exam and may be scheduled without consulting students. Make-up exams typically consist of essay and calculation questions but instructors retain the right to offer multiple choice makeup exams or exams of mixed formats in some circumstances.

Grading Criteria

This grading scale shows the percentage you must earn at the end of BMB462 to guarantee a particular grade. Your overall course grade percent will be rounded to the nearest tenth. Grades for graduate students will be determined from the undergraduate distribution.

Honors option

Students may elect to take BMB462 with an H-option provided they obtain a grade of 3.0 or higher in the course. The honors option consists of finding research articles and writing a term paper that address an unsolved biochemical question related to a topic covered in the course. Students interested in the honors option should check D2L during the first week of class for more information and deadlines.

Grade	Percentage
4.0	≥ 88.0
3.5	≥ 77.0
3.0	≥ 69.0
2.5	≥ 60.0
2.0	≥ 52.0
1.5	≥ 45.0
1.0	≥ 40.0
0.0	< 39.9

Attendance policy

This course follows the General University Attendance Policy (see <https://ombud.msu.edu/classroom-policies/>). Attendance itself is not a required component of the course, although students that attend class regularly perform better in the course and students are able to earn in-class clicker points on every non-exam day. If you miss a class, it is expected that students learn the material covered in class that day on their own. See the Make-Up Policy section for information about missing graded assessments.

Course Management Software

We will use D2L to post lecture handouts, lecture recordings, grades, and other general course information. We will use the news feature and the e-mail feature in D2L to provide information about the course. It is expected that students are regularly checking D2L for updates about the course.

SaplingLearning will be used for online homework assignments. There are help resources within this system to help you learn how to use and navigate the assignments. More information about how to register for the system will be delivered during the first week of class.

Resources

This course extensively uses Desire2Learn (D2L) for the posting of lecture material. Students are expected to check these sites regularly for newly posted material. As members of a learning community, students are expected to respect the intellectual property of course instructors. All course materials presented to students are the copyrighted property of the course instructor. As such you may not post the recordings or other course materials online or distribute them to anyone not enrolled in the class without the advance written permission of the course instructor and, if applicable, any students whose voice or image is included in the recordings. Any student violating this restriction may face academic disciplinary sanctions.

Lecture Notes

Lecture notes will be posted on D2L in advance of the lectures. These notes contain most figures discussed during lecture and are designed to aid your note taking during lecture and while reading the text. They are not a substitute for reading the textbook. It is highly recommended that you print these lecture notes and read the assigned reading in the text prior to lecture, taking notes while you read. Then bring your notes to lectures to help fill in areas that were confusing to you when you first read them in the text.

Course Recordings

When possible, audio-video recordings of the lectures will be provided on D2L. The purpose of these recordings is to allow review of lectures as you study. **BMB 462 is not an online course**, and these recordings are not a substitute for attending lectures and taking notes. **You should not depend on these recordings**: some lectures may not be available or may be of poor quality due to technical difficulties. In such cases, there will be no recording posted. In addition, it is at the instructor's discretion to turn on the recording only after announcements regarding exams, etc. have been made.

Previous Exams

Exams from a few previous semesters will be posted on D2L. Please note that some of these exams may be from semesters when exam policies or course schedule differed from the current semester. The exam keys will be posted no later than three days prior to each exam date.

Instructor review sessions

There will be scheduled exam review sessions led by a course instructor before each scheduled exam. These review sessions take the form of “question and answer” sessions, where students should come prepared to ask questions about course material. The exact dates, times and locations of these review sessions will be announced before each exam.

Extra course help

Students are strongly encouraged to use the optional TA-led review sessions, instructor-led exam review sessions and visit the regularly scheduled office hours for help in the course. For students desiring additional help, potential course tutors can be found at:

<https://bmb.natsci.msu.edu/undergraduate/tutoring/> .

Accommodations

Michigan State University is committed to providing equal opportunity for participation in all programs, services and activities. Requests for accommodations by persons with disabilities may be made by contacting the Resource Center for Persons with Disabilities at 517-884-RCPD or on the web at rcpd.msu.edu. Once your eligibility for an accommodation has been determined, you will be issued a Verified Individual Services Accommodation ("VISA") form. Please present this form to Prof. Haudek at the start of the term and/or two weeks prior to the accommodation date. Requests received after this date may not be honored.

Academic Honesty

[The Spartan Code of Honor](#) states, "As a Spartan, I will strive to uphold values of the highest ethical standard. I will practice honesty in my work, foster honesty in my peers, and take pride in knowing that honor is worth more than grades. I will carry these values beyond my time as a student at Michigan State University, continuing the endeavor to build personal integrity in all that I do." In addition, Article 2.III.B.2 of the [Student Rights and Responsibilities \(SRR\)](#) states that "The student shares with the faculty the responsibility for maintaining the integrity of scholarship, grades, and professional standards." This course adheres to and strictly enforces the policies on academic honesty as specified in General Student Regulations 1.0, Protection of Scholarship and Grades; the all-University Policy on Integrity of Scholarship and Grades; and Ordinance 17.00, Examinations. (See [Spartan Life: Student Handbook and Resource Guide](#) and/or the MSU Web site: www.msu.edu.)

Therefore, unless authorized by your instructor, you are expected to complete all course assignments, with the exception of homework and in-class clicker questions, without assistance from any source. Students who violate MSU academic integrity rules may receive a penalty grade, including a failing grade on the assignment or in the course. *Using multiple clickers to send in answers for classmates who are not present is considered academic dishonesty.*

SIRS

Michigan State University takes seriously the opinion of students in the evaluation of the effectiveness of instruction, and has implemented the SIRS (Student Instructional Rating System) process to gather student feedback. This course utilizes the “online SIRS” system, and you will receive an e-mail sometime during the last two weeks of class asking you to fill out the SIRS at your convenience. As a reminder to be sure to fill out the SIRS evaluation form, the final grade for this course will not be accessible on STUINFO during the week following the submission of grades for this course unless the SIRS online form has been filled out. You have the option on the online SIRS form to decline to participate in the evaluation of the course.

Date	Lec. #	Topic	Reading Pages	Instructor
30-Aug	1	Lipid Structures and Properties	361-374	Haudek
1-Sep	2	Lipid Structures and Properties	374-376; 381-384	Haudek
4-Sep	Labor Day – University Closed			
6-Sep	3	Membrane Structure and Properties	387-405	Haudek
8-Sep	4	Membrane Structure and Properties	387-405	Haudek
11-Sep	5	Membrane Transport	405-431	Haudek
13-Sep	6	Signaling	437-466; 467-474	Haudek
15-Sep	7	Signaling	437-466; 467-475	Haudek
18-Sep	8	Lipid Catabolism	649-670	Haudek
20-Sep	9	Lipid Catabolism	649-670	Haudek
22-Sep	10	Fatty Acid Biosynthesis	811-826	Haudek
	Optional Q and A by Instructor:			
25-Sep	Exam I: Lectures 1-9			
27-Sep	11	Fatty Acid Biosynthesis	811-826	Haudek
29-Sep	12	Glycerolipid and Sphingolipid Anabolism	826-836	Haudek
2-Oct	13	Cholesterol Metabolism	837-854	Haudek
4-Oct	14	Amino Acid Metabolism	690-705	Haudek
6-Oct	15	Amino Acid Metabolism	859-872 ; 880-887	Haudek
9-Oct	16	Metabolic Integration	907-939	Haudek
11-Oct	17	Metabolic Integration	907-940	Haudek
13-Oct	18	Nucleotide Chemistry and Metabolism	279-285; 310-313; 888-902	Haudek
16-Oct	19	Nucleotides and Nucleic Acids	29-40; 285-299; 955-956	Haudek
18-Oct	20	DNA Structure and Function	285-294	Haudek
	Optional Q and A by Instructor:			
20-Oct	Exam II: Lectures 10–20			
23-Oct	21	Chromosome Structure	957-981	Haudek
25-Oct	22	DNA Replication	987-1005	Haudek
27-Oct	23	DNA Replication	987-1005; 1063-1074	Haudek
30-Oct	24	DNA Repair & Recombination	1005-1016; 297-300	Floer
1-Nov	25	DNA Repair & Recombination	1016-1031	Floer
3-Nov	26	RNA Structure & Function	34-35; 290-295; 955-956	Floer
6-Nov	27	Transcription	1035-1039	Floer
8-Nov	28	Transcription	1039-1042; 1133-1134	Floer
10-Nov	29	Transcription	1042-1047	Floer
	Optional Q and A by Instructor:			
13-Nov	Exam III: Lectures 21-29 ONLY			
15-Nov	30	RNA Processing	1047-106	Floer
17-Nov	31	RNA Processing	1047-1063	Floer
20-Nov	32	Translation	1077-1085	Floer
22-Nov	33	Translation	1088-1101	Floer
24-Nov	Thanksgiving Break – University Closed			
27-Nov	34	Translation	1101-1113	Floer
29-Nov	35	Protein Targeting and Degradation	1114-1123	Floer
1-Dec	36	Regulation of Gene Expression	1127-1138	Floer
4-Dec	37	Regulation of Gene Expression	1138-1147	Floer
6-Dec	38	Regulation of Gene Expression	1147-1160	Floer
8-Dec	39	DNA Cloning	319-335	Floer
	Optional Q and A by Instructor:			
13-Dec	Exam IV: Lectures 30-39 ; 7:45 a.m. - 8:45 a.m.
