

Institute for Quantitative Health Science & Engineering and Biomedical Engineering

Cordially invites you to attend a graduate seminar:

Peripheral Neural Interfacing in Bionic Limb Control and Bioelectronic Medical Applications

Mario Romero-Ortega, PhD

Associate Professor of Bioengineering
University of Texas at Dallas

Dr. Romero is an Associate Professor of Bioengineering at the University of Texas at Dallas, adjunct faculty in the Surgery department at the University of Texas Southwestern Medical Center (UTSW), and Partner Researcher at the University of Wollongon, Australia. He received his doctorate in Neuroscience from Tulane University and postdoctoral training from UTSW as Associate Member of the Christopher Reeve Paralysis Foundation Research Consortium on Spinal Cord Injury.

Wednesday, July 18, 2018 – 11:00 AM
IQ Atrium
